

The epiSTEME conferences are unique as they bring together researchers in science, technology and mathematics education in an interdisciplinary exchange. Research presented in epiSTEME conferences is inspired by cognitive, pedagogical, historical, philosophical and socio-cultural aspects of the sciences.

The name epiSTEME connotes, at one level a systematic study of knowledge, while as an acronym it suggests a meta-view of science, technology and mathematics education. The conference will include review talks, paper and poster sessions, and group discussions. Pre and post conference workshops will be announced on the website.
